

ElectroLaser

Ale Batarse, Duncan Monahan

Overview

History

Plan and implantation

Upsides/pros

Downsides/cons

Summary

References

History

- It was first developed and tested by the U.s Navy.

Plasma Channels

- The electro laser is used through Plasma channels.
- The Plasma Channels can be used to study lightning.

Impact

- The impact the electro laser is huge it will greatly impact knowledge on laser weapons.
- Along with using it in the military for self defense against other forces.

Pros/Upsides of the Electrolaser

Other uses/pros

- The electrolaser is mainly used to strike a target.
- But also used to study lightning during a thunderstorm.

Downsides/Cons

Downsides/Cons

- A downside of the electro laser is it is mainly used to as a weapon.
 - It is inconsistent and can cause accidents.

Summary

- The Electro laser can be used for good but also bad.
- We can use it to study lightning and other patterns.
- It is inconsistent but once we learn how to use it it will be an amazing tool.

For

- The Use of the electrolaser as weapon can be a positive for war.
- Studies lightning

Against

- You could be against this weapon because it is mainly used for violence and to kill.
- It also is inconsistent and often times screws up.
